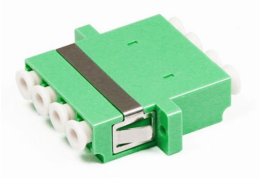
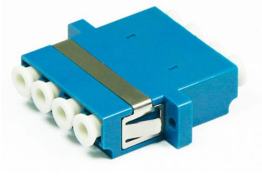
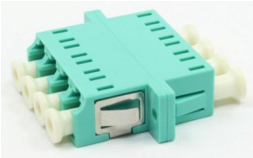
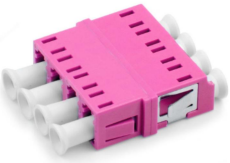
LC SM and MM Quad Adaptor without Shutter









DESCRIPTION

A fiber optic adapter, commonly referred to as a coupler, is a compact device designed to connect or terminate fiber optic cables or connectors between two fiber optic lines. Fiber optic adapters facilitate optimal transmission of light signals while minimizing loss. Additionally, these adapters offer several advantages, including low insertion loss, excellent interchangeability, and reproducibility.

FEATURES

- Low insertion loss of ≤0.2 dB (Typical).
- Protective dust cap to maintain cleanliness of the adapter's interior.
- Stainless steel clips facilitate tool-less snap-in installation.
- Available in a variety of connector types.

APPLICATIONS

→ Local Area Network Or Internet
→ Fiber Optic Termination
→ Networking
→ Security System

SPECIFICATIONS

Items		SM	MM
Connector Type		LC-LC	
Insertion loss	UPC	≤0.2dB	≤0.2dB
	APC	≤0.2dB	/
Flange		Customized	
Body Style		Quad	
Colour		Blue, Green, Aqua, Beige, Violet	
Durability		1000 times	

LC SM and MM Quad Adaptor without Shutter
